Models

The following models are represented in this publication.

Single Reduction Models

Forward Axle	Rear Axle	Axle Capacity	Gear Size
DST40(P)	RST40	40,000 Lbs	15.40"/16.50"
DST41(P)	RST41	40,000 Lbs	15.40"/16.50"

Single Reduction Models W/Wheel Differential Lock

Forward Axle	Rear Axle	Axle Capacity	Gear Size
DDT40(P)	NA	40,000 Lbs	15.40"/16.50"
DDT41(P)	NA	40,000 Lbs	15.40"/16.50"

General Information

How To Use Illustrated Parts List

Ordering Parts

- This parts book is organized in sections according to parts servicing requirements. Use the Contents or page headings and colored tabs to find information.
- Use this book to order parts for your Spicer® Axle.
- For convenience, part numbers have been included for all pieces of the carrier assembly. Some of these parts, such as the carrier and caps, are serviced only in kits or assemblies. Part numbers are for your reference only. Those parts not serviced separately are identified with NSS.

Kits and Assemblies

- Kits and Assemblies contain groups of individual or assembled parts developed for optimal replacement or repair of a service problem.
- Kits and Assemblies are shown with applicable parts groupings in the parts listing.
- See the Appendix for detailed information concerning kits applicable to this model.

Abbreviations

- **AR - As Required** - Parts that vary in quantity with each axle. Example: shims
- **NSS - Not Serviced Separately** - Items which can only be purchased in sets, kit form or service assemblies. Example: brake shoes.
- **RH/LH - Right Hand/Left Hand** - Determined as viewed from behind the vehicle looking forward.
- **“RTV” - Gasket Compound** - Formed-in-place gasket sealer. It is recommended for use on all surfaces requiring a gasket.
- **Assy - Assembly**

- **Brg - Bearing**
- **Diff - Differential**
- **Hsg - Housing**
- **Inv- Involute**
- **IASS - In Axle Speed Sensor**
- **ABS - Antilock Brake System**
- **N/A - Not Applicable**
- **Str- Straight**

Illustrations

- Illustrations show parts in assembly groups.
- Item numbers on illustrations correspond with parts listings on pages that accompany the drawings.
- Notes are included on illustrations where needed.

Parts Listings

- Parts listings are defined by parts groupings and are broken down by service assemblies.
- Parts Listings identify a part for servicing with the following categories:
 - **Item** - corresponds with numbers on illustrations for part identification
 - **Description** - specifies part name or description
 - **Quantity (Qty)** - quantity required for assembly
 - **Current Part** - service part numbers are broken down by model, type or other applicable information
 - **Notes** - define unique characteristics or replacement notes
 - **Kits / Assy's Where Used** - indicates Kits or Assemblies that contain a particular part
- **Other pertinent information is listed in tables or parts listings as required.**

Effectively Using a Parts Listing—Example

- Follow the example below to locate and order exactly what is required for servicing.

Match to items on illustration	Use to identify Part	Order this quantity for servicing	Order Part Number by Model indicated		Indicates information important to ordering or use
Item	Description	Qty	DST40(P)	DDT40(P)	Notes
7	Brg Cup - Plain Half	1	129566 •	015092 •	
8	Brg Cone - Plain Half	1	129565 •	128604 •	

Summary of Kits and Assemblies

Item	Description	DST40(P)	DDT40(P)	Notes
	OIL SEAL & SHIM KIT	216224	216224	Includes 49-54 & 127592
	BASIC OVERHAUL KIT	510393	510393	Contents Identified with •

Model Identification

Locating Model Designation Information

- Axle Model Identification, Part Number and Serial Number are located on a tag at the axle centerline. This information will help to locate information in this book and to identify the correct parts for servicing.

Drive Axles

- **Model Number, Part Number and Serial Number** are located on the data plate on the axle centerline

Drive Axle Assembly Tag

1. The OEM part number assigned to the axle build.
2. The specification number assigned to the axle build by Spicer. The spec number will identify all the component parts of the axle as built by Spicer, including special OEM requirements such as yokes or flanges.
3. The axle model identification.
4. The production or service part number of the carrier assembly.
5. The gear ratio of the axle.
6. The serial number of the carrier assembly assigned by the manufacturing plant.

Note: When inquiring about specific information on your axle, write down all of the above information from your tag and call your local OEM dealer or your Dana representative.

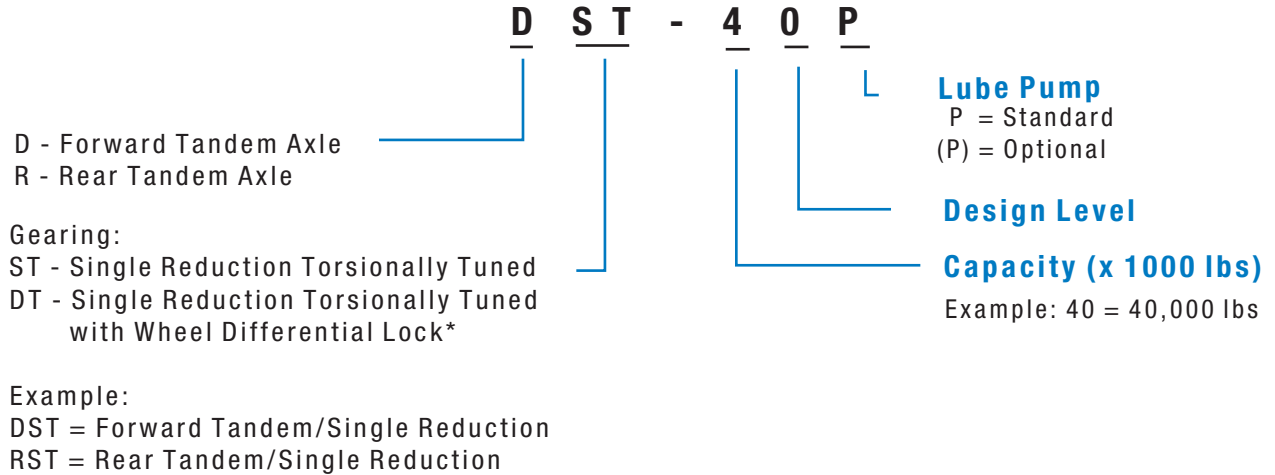

7. Country of Origin

- The axles illustrated in this book are specified with a variety of different axle shafts, according to OEM specifications. **When ordering replacement axle shafts, note the part number stamped into the flange.**

Using Model Designation to Identify Axle Components

- The Axle Model Identification number contains information that is important to understand when purchasing service parts or new components. The Model Identification number provides important vehicle, capacity and application information and model features. Use this guideline to understand your Axle Model Identification. If you need assistance, contact your Dana representative.

*Wheel Differential Lock is only available on Forward Axles

Note 1: On 4/1/05, there were several design changes to the RST40 and RST41 models, which are noted below. For additional information, please see Service Bulletin ABIB-0510R1.

- Carrier & Cap Change: The new RST40 and RST41 carrier and cap is unique in its design. The casting number located on the outside edge of the carrier makes it visibly easy to distinguish between old and new design carriers. Order the Carrier & Cap Conversion kit, Part Number 514064, to convert original design models.

NSS - Not Sold Separately

Note 1: On 4/1/05, there were several design changes to the RST40 and RST41 models, which are noted below. For additional information, please see Service Bulletin ABIB-0510R1.

- Inner Pinion Bearing Change: Models produced after 4/1/05 require the use of a new inner pinion bearing. The previous inner pinion bearing will not work with the new gear set. The current Gear & Pinion kits include this bearing.
- Pinion Bearing Cage Change: The pinion bearing cage, capscrews and shims were all upgraded to that which is common to the RS404. Carriers made after 4/1/05 have metric threaded pinion bearing cage holes and require the use of 210115 metric-threaded capscrew. This new pinion bearing cage is common to all ratios.
- If you order or rebuild an original axle with the current design gear set you must use the appropriate nut/bolt fasteners.

Note 2: When changing ratios from 3.55 or 3.70 to any other ratio, on early models only, it will require a change in cage & cup part numbers.

Bearing Spacers

SHAIS136	1	Instruction Sheet

Axle Housing Fasteners - Rear-Rear Models

On May 1, 2005 the RST40 and RST41 models were upgraded to a new "Thick Flange" carrier design as fully detailed in Spicer bulletin ABIB-0510R1. Shown below are the axle housing hardware kits and fastener locations for both variations. View fastener locations as if installing differential into the axle housing.

Head to Housing Fasteners

A – 127641 Studs & 127567 Nuts
 B – 130836 Capscrews – Short (45 mm)
 C – 130837 Capscrews – Long (70 mm)
 D – 130877 Flat Washers – All Locations

514260 Hardware Kit - Thick Flange (After May 2005)

Part No.	Qty.	Description
107276S	1	RTV Sealant 3 oz. Tube
130836	8	Capscrew (45 mm) - Short
130837	4	Capscrew (70 mm) - Long
130877	12	Washer
054254	1	Magnetic Drain Plug - 3/4"
129491	1	Magnetic Plug - 3/4"
129193	1	Input Shaft
SHAIS172	1	Instruction Sheet - Thick Flange

514259 Hardware Kit - Thin Flange (Prior to May 2005)

Part No.	Qty.	Description
107276S	1	RTV Sealant 3 oz. Tube
090422	4	Lockwasher
090208	4	Nut
054254	1	Magnetic Drain Plug - 3/4"
129491	1	Magnetic Plug - 3/4"
130187	8	Capscrew
068399	1	Stud
036435	3	Stud
129293	1	Loctite 271 0.5 ml. Tube
SHAIS172	1	Instruction Sheet

IMPORTANT!

Spicer does not recommend the mixing of various designs carrier-to-housing capscrews on the same assembly. Whether mixing or not, torques must be measured using a calibrated torque wrench. Failure to re-torque bolts and nuts to proper specifications may lead to carrier to housing leaks and possible component damage.

Axle Shafts

DO NOT MISPLACE AXLE SHAFTS FROM THEIR INTENDED LOCATION.

Note: STR - Straight, TPR - Tapered

Gear & Pinion Kits

Dana has highly developed primary axle gearing which is only used in matched sets. These sets are identified by the mating parts listed below. Within any Dana production drive axle or genuine Spicer® Gear & Pinion service kits, these mated part numbers will appear. Because they are developed as a set with precision machining, never mix gears and pinions from different mated sets within an axle. Shortened gearing life, noise and failure may occur. Always use genuine Spicer® products

Note 1: Effective April 1, 2005, drive pinions for the RST40 and RST41 models were redesigned. The new design requires the use of a new inner pinion bearing, part number 129562. This bearing is included with all RST40 and RST41 service gear sets. For additional information on these changes, please see Service Bulletin ABIB-0510R1.

- Current model gear sets are designed to use ring gear bolt part number 129686 and nut part number 126216, which are sold in Service Kit 508652. Use this kit for axles manufactured after April 1, 2005 or if you are rebuilding an axle with an "original" design gear set.
- Original design gear sets, used in models built prior to April 1, 2005, use ring gear bolt part number 67586 and nut part number 60600, which are sold in Service Kit 70745. When rebuilding an axle with a current design gear set you must use the appropriate nut/bolt fasteners.

RST40, RST41, ratios 2.64-5.57, Prior to 4/1/05	511115
RST40, RST41, ratios 2.64-5.57, After 4/1/05	514061
RST40, RST41, ratios 6.17-7.17, Prior to 4/1/05	512830
RST40, RST41, ratios 6.17-7.17, After 4/1/05	514062
Bearing Kits	
DST40(P), DST41(P)	512812
DDT40(P), DDT41(P)	512800
RST40, RST41, ratios 2.64-5.57, Prior to 4/1/05	512828
RST40, RST41, ratios 2.64-5.57, After 4/1/05	514059
RST40, RST41, ratios 6.17-7.17, Prior to 4/1/05	512829
RST40, RST41, ratios 6.17-7.17, After 4/1/05	514060
Diff Carrier & Bearing Caps Kits	
DST40, DST41	510023
DST40(P), DST41(P)	510024
DDT40, DDT41	510027
DDT40(P), DDT41(P)	510028
RST40, RST41, Prior to 4/1/05	211219
RST40, RST41, After to 4/1/05	514063
Diff Carrier & Bearing Caps Conversion Kit	514064
Input Shaft Kit	510593

Description	Part Number
Oil Seal Driver Installation Kit	217414
Oil Seal Shim Kits	
DST40(P), DST41(P), DDT40(P), DDT41(P)	216224
RST40, RST41, Prior to 4/1/05	511169
RST40, RST41, After 4/1/05	216225
Output Shaft Kit	216227
Ring Gear Nut & Bolt Kit	
Forward axles	508652
Rear axles manufactured after 4/1/05	508652
Rear axles manufactured prior to 4/1/05	70745
Shift Fork & Compression Spring Kit	510870
Wheel Diff Case Kits	
DST40(P), DST41(P) - Ratios 2.64 to 3.25	508653
DST40(P), DST41(P) - Ratios 3.36 to 3.90	508654
DST40(P), DST41(P) - Ratios 4.11 to 4.88	508655
DST40(P), DST41(P) - Ratios 5.29 to 7.17	508656
DDT40(P), DDT41(P) - Ratios 2.64 to 3.25	508724
DDT40(P), DDT41(P) - Ratios 3.36 to 3.90	508725
DDT40(P), DDT41(P) - Ratios 4.11 to 4.88	508726
DDT40(P), DDT41(P) - Ratios 5.29 to 7.17	508727
RST40, RST41 - 2.64 to 3.25	511136
RST40, RST41 - 3.36 to 5.29	511137
RST40, RST41 - 5.57 to 7.17	511138
Wheel Diff Side Gear Kit	
DST40(P), DST41(P), DDT40(P), DDT41(P)	510397
RST40, RST41	511139
Wheel Diff Kit less Side Gears	
DST40(P), DST41(P), DDT40(P), DDT41(P)	510396
RST40, RST41	511140
